EXPERIENCE

Self-Learning Projects (Ongoing)

Jan 2024 — Present

Currently working on to build a foundation on Java, Python, Javascript etc by:

- Exploring fundamental topics like data structures, algorithms, and database management
- Building web development projects using Javascript, HTML, CSS, React, Node.JS etc.
- Experimenting with small tasks like creating simple programs (e.g., whether app or movie recommendation engine etc.)

Technologies: Java, Python, Javascript, HTML, CSS, React, Node.JS

EDUCATION

York University, Bachelor of Honours in Computer Science

2024 — 2028 (Expected)

- Current GPA: 5.17
- Pursuing Honours Degree in Computer Science
- Enhancing skills through self-learning and online certifications.

CURRENT PROJECTS

Portfolio Website

- Creating a personal portfolio using HTML, CSS, and JavaScript to showcase my skills and learning journey.

Movie Recommendation Engine

- Developed a movie recommendation website as part of a personal university project.

AI Chatbot

- Developing a simple AI chatbot with useful functionalities using Python and API Integration.

SKILLS

- Code: Java, Python, Javascript, React, NodeJS, HTML, CSS
- Tools: Git, GitHub, SQL, Google Sheets, MS Office, macOS, Windows, Shell

SOFT SKILLS

- Problem-Solving & Analytical Thinking
- Strong Communication
- Adaptability & Team Collaboration
- Attention to detail
- Multi-task & Time Management

TECHNICAL INTERESTS

I enjoy solving algorithmic and data structure challenges on platforms like LeetCode and Codeforces, as it enhances my problem-solving skills and logical thinking. I am passionate about bringing innovative ideas to life by leveraging technology to build impactful solutions.
